

ERIC GARCETTI
MAYOR

Public Order Under City of Los Angeles Emergency Authority

Issue Date: September 22, 2021

Subject: SAFER L.A.

On June 15, 2021, California fully reopened the economy, and the State terminated the restrictions on businesses and activities in its Blueprint for a Safer Economy. Epidemiologic evidence demonstrates that since June 15, 2021, the rate of community transmission of COVID-19 here in Los Angeles has increased from low to high. On September 16, 2021, Los Angeles County reported 2,023 new cases. As of September 9, 2021, and although the test and hospitalizations have declined or appear to be stable, the County is reporting a 7-day daily average case rate of 15.1 cases per 100,000 people. Based upon federal Centers for Disease Control and Prevention (CDC) indicators and thresholds, this means that community transmission of COVID-19 within Los Angeles County is now considered High and highly likely to increase during the coming weeks as we start to move into the winter months when respiratory viruses, like influenza and SARS-CoV-2, have spread more easily.

On July 28, 2021, the CDC and the California Department of Public Health each issued new guidance validating the universal indoor masking requirements of this Order. The CDC's Interim Public Health Recommendations for Fully Vaccinated¹ People advises that "preliminary evidence suggests that fully vaccinated people who are infected with the Delta variant can spread the virus to others" and therefore recommends that fully vaccinated people wear a mask in public indoor settings in geographic areas of Substantial or High transmission. In addition, the State Public Health Officer recommends universal masking regardless of vaccination status, in public indoor settings across California.

Here in Los Angeles, COVID-19 remains a concern to public health. Even though more people in the County are vaccinated, there remains a risk that people may come into

¹ People are considered "fully vaccinated" against COVID-19 two weeks or more after they have received the second dose in a 2-dose series (e.g., Pfizer-BioNTech or Moderna) or 2 weeks or more after they have received a single-dose vaccine (e.g., Johnson and Johnson [J&J]/Janssen).

contact with others who have COVID-19 when outside their residence. There are still millions of people in the County who are not yet fully vaccinated, including children under 12 years old, who are not currently eligible, and people who are immunocompromised and may be vulnerable to infection and disease. Most COVID-19 infections are caused by people with no or mild symptoms of infection and disease. Furthermore, variants of the virus that may spread more easily or cause more severe illness remain present and have increased in our County. Currently, the Delta variant is predominant in Los Angeles County. In the absence of physical distancing requirements for the public and capacity limits for indoor and outdoor settings, unvaccinated and partially vaccinated persons are more likely to get infected and spread the virus, which is transmitted through the air and concentrates in indoor settings. We have seen surges in Los Angeles, and in other parts of the country and the world, continuously impacting younger adults.

The best way to reduce the current level of community transmission and to prevent future surges is for everyone who is eligible, including those who have recovered from a COVID-19 infection, to get fully vaccinated as soon as possible.

In order to continue to protect the community from COVID-19, in particular for those who are not fully vaccinated and fully vaccinated but immunocompromised, this Order aligns with the County of Los Angeles Department of Public (LACDPH) Health Officer Order, dated September 17, 2021, and mainly aligns with the State Public Health Officer Order, dated June 11, 2021. Further, this Order incorporates by reference the July 26, 2021 State Public Health Officer Order, which requires specific transmission prevention measures to be taken by Acute Health Care and Long-Term settings, High-Risk Congregate settings, and Other Health Care settings. The primary intent of this Order is to help slow the High level of community transmission here in Los Angeles County, and to align with updated County and State requirements and recommendations.

Under the provisions of Section 231(i) of the Los Angeles City Charter and Chapter 3, Section 8.27 of the Los Angeles Administrative Code, I hereby declare that the Safer L.A. Order, dated August 24, 2021, is withdrawn and superseded by this Order, which is necessary for the protection of life and property in the City of Los Angeles and is effective on Thursday, October 7, 2021 at 11:59 PM:

1. All persons living within the City of Los Angeles should continue to practice required and recommended COVID-19 infection control measures at all times and when among other persons when in community, work, social or school settings, especially when multiple unvaccinated persons from different households may be present and in close contact with each other, especially when in indoor or crowded outdoor settings.

2. **Face Masks**

All individuals must follow the requirements included in this Order, the LACDPH Health Officer Order (dated September 17, 2021) and the July 28, 2021 Guidance for the Use of Face Coverings issued by the California Department of Public Health. These

requirements are aligned with the July 28, 2021 recommendations issued by the CDC. The CDC recommendations provide information about both indoor and higher risk settings where masks are required or recommended to prevent transmission to:

- Persons with a higher risk of infection (e.g., unvaccinated or immunocompromised persons),
- Persons with prolonged, cumulative exposures (e.g., workers), or
- Persons whose vaccination status is unknown.

When people wear a mask correctly, they protect others as well as themselves. Consistent and correct mask use is especially important indoors and outdoors when in close contact with (less than six feet from) others who are not fully vaccinated against COVID-19 or whose vaccination status is unknown.

- a. Masks are required to be worn by everyone, regardless of COVID-19 vaccination status, in the following settings:
 - i. On public transit (examples: airplanes, ships, ferries, trains, subways, buses, taxis, and ride-shares),
 - ii. In transportation hubs (examples: airport, bus terminal, marina, train station, seaport or other port, subway station, or any other area that provides transportation),
 - iii. Indoors in K-12 schools, childcare and other youth settings,
 - iv. Healthcare settings (including long-term care facilities),
 - v. State and local correctional facilities and detention centers,
 - vi. Homeless shelters, emergency shelters, and cooling centers,
 - vii. All indoor public settings, venues, gatherings, and public and private businesses (some examples: offices, manufacturing, warehouses, retail, food and beverage services, theaters, family entertainment centers, meetings, and state and local government offices serving the public, Indoor Mega Events, among others), and
 - viii. Outdoor Mega Events.
- b. Recommendation for higher level of protection: In indoor public and private settings where there is close contact with other people who may not be fully vaccinated, individuals should consider wearing a higher level of protection, such as wearing two masks (“double masking”) or wearing a respirator (e.g., KN95 or N95). This is particularly important if an individual is not fully vaccinated and is in an indoor or crowded outdoor setting.

- c. Individuals, businesses, venue operators or hosts of public indoor settings, venues, gatherings, businesses and Outdoor Mega Events must:
 - i. Require all patrons, customers and guests to wear masks when inside at all indoor settings and at Outdoor Mega Events, regardless of their vaccination status; and
 - ii. Post clearly visible and easy to read signage, with or without having an employee present, at all entry points for indoor and outdoor settings to communicate the masking requirements for patrons, customers and guests.
- d. For clarity, patrons, customers or guests at public indoor settings, venues, gatherings, public and private businesses, and Outdoor Mega Events are required to wear a face mask except while:
 - i. Actively eating or drinking, which is the limited time during which the mask can be removed briefly to eat or drink, after which it must be immediately put back on. Patrons, customers or guests must be seated at a table or positioned at a stationary counter, ticketed seat, or place while actively eating or drinking.
 - ii. Showering or engaging in personal hygiene or a personal care service that requires the removal of the face mask, and
 - iii. Alone in a separate room, office or interior space.
- e. Special considerations are made for people with communication difficulties or certain disabilities. Clear masks or cloth masks with a clear plastic panel that [fit well](#) are an alternative type of mask for people who interact with: people who are deaf or hard of hearing, children or students learning to read, people learning a new language, and people with disabilities.
- f. All businesses, venue operators or hosts must implement measures to clearly communicate to non-employees the masking requirements on their premises.
- g. No person can be prevented from wearing a mask as a condition of participation in an activity or entry into a business.
- h. The categories of persons who are exempt from mask requirements, remain unchanged at this time and can be found at: <http://publichealth.lacounty.gov/acd/ncorona2019/masks/#notwear>.
- i. In workplaces, certain employees may be exempt from wearing a mask when performing specific tasks which cannot feasibly be performed while wearing a mask. This exception is limited to the period of time in which such tasks are

actually being performed. Workers who cannot feasibly wear a mask while performing their work must be tested for COVID-19 at least twice per week, unless the employer is provided proof of the employee's full vaccination against COVID-19 or proof of recovery from laboratory-confirmed COVID-19 within the past 90 days against COVID-19.

In workplaces, most employers and businesses are subject to the Cal/OSHA [COVID-19 Emergency Temporary Standards \(ETS\)](#) and some to the [Cal/OSHA Aerosol Transmissible Diseases Standards](#), and should consult those regulations for additional applicable requirements. The ETS allow local health jurisdictions to require more protective mandates. This Order, which aligns with the LACDPH Health Officer Order (dated September 17, 2021), and which requires masking of all individuals at indoor public settings and businesses, and Outdoor Mega Events, regardless of vaccination status, is such a mandate in Los Angeles County, and overrides the more permissive ETS regarding employee² masking.

- j. All employers and businesses subject to Cal/OSHA must review and comply with the active Cal/OSHA COVID-19 Prevention Emergency Temporary Standards (ETS). As approved and effective, the full text of the COVID-19 Prevention emergency standards will be listed under [Title 8, Subchapter 7, sections 3205-3205.4](#) of the California Code of Regulations. All businesses or employers with independent contractors should also review the State Labor Commissioner's Office webpage entitled, "[Independent contractor versus employee.](#)" which discusses the "employment status" of persons hired as independent contractors, to ensure correct application of the ETS.

3. Mandatory Reporting by Businesses and Governmental Entities

Persons and businesses within the County of Los Angeles Public Health Jurisdiction are required to follow the COVID-19 infection control protocols and guidance provided by the LACDPH regarding isolation of persons confirmed or suspected to be infected with the virus that causes COVID-19 disease or quarantine of those exposed to and at risk of infection from COVID-19. In instances where the County has not provided a specific guidance or protocol, specific guidance or protocols established by the State Public Health Officer shall control.

- a. In the event that an owner, manager, or operator of any business knows of three (3) or more cases of COVID-19 among their employees within a span of 14 days, the employer must report this outbreak to the Los Angeles County Department of Public Health at (888) 397-3993 or (213) 240-7821, or online at www.redcap.link/covidreport.
- b. In the event that an owner, manager, or operator of any business is informed that one or more employees, assigned or contracted workers, or volunteers of the

² Some independent contractors are considered as employees under the State Labor Code. For more details, check the California Department of Industrial Relations' [Independent contractor versus employee](#) webpage.

business has tested positive for, or has symptoms consistent with COVID-19 (case), the employer must have a protocol to require the case(s) to isolate themselves at home and require the immediate self-quarantine of all employees that had a workplace exposure to the case(s).

4. LACDPH Best Practice Guidance.

- a. All individuals and Businesses are strongly urged to follow the LACDPH Best Practice Guidance, containing health and safety recommendations for COVID-19.
- b. Considerations for Persons at Higher Risk for Negative Health Outcomes: People at risk for severe illness or death from with COVID-19 - such as unvaccinated older adults and unvaccinated individuals with health risks - and members of their household, should defer participating in activities with other people outside their household where taking protective measures, including wearing face masks and social distancing, may not occur or will be difficult, especially indoors or in crowded spaces. For those who are not yet fully vaccinated, staying home or choosing outdoor activities as much as possible with physical distancing from other households whose vaccination status is unknown is the best way to prevent the risk of COVID-19 transmission.
- c. Encourage Activities that Can Occur Outdoors. All Businesses and governmental entities are urged to consider moving operations or activities outdoors, where feasible and to the extent allowed by local law and permitting requirements, because there is generally less risk of COVID-19 transmission outdoors as opposed to indoors.
- d. Ventilation Guidelines. All Businesses and governmental entities with indoor operations are urged to review the Ventilation Guidelines and implement ventilation strategies for indoor operations as feasible. See California Department of Public Health [Interim Guidance for Ventilation, Filtration and Air Quality in Indoor Environments](#) for detailed information. Nothing in this Order limits any ventilation requirements that apply to particular settings under federal, state, or local law.
- e. High-Risk Health Care and Congregate Settings. This Order incorporates by reference, the State Public Health Officer Order of July 26, 2021, which requires additional statewide facility-directed measures to protect particularly vulnerable populations. The Order is found here: [State Public Health Officer Order of July 26, 2021](#).

5. Sectors that Continue to Require Additional Risk Reduction Measures.

The following sectors serve persons and populations that have lower rates of vaccination, who are at higher risk of being infected, or who are not yet eligible to be

vaccinated. As such, these sectors continue to require additional risk reduction measures and must operate subject to the following conditions listed below and those specified in the County sector-specific reopening protocol(s) located at: <http://publichealth.lacounty.gov/media/Coronavirus/index.htm>:

- a. **Day camps.** Day camp owners and operators must implement and post the required LACDPH Reopening Protocol for Day Camps, attached to the LACDPH Health Officer Order (dated September 17, 2021) as [Appendix K](#).
- b. **Schools (K-12) and School Districts.** All public and private schools (K-12) and school districts within the County of Los Angeles may open for in-person classes. Educational facilities serving students at any grade level must prepare, implement and post the required LACDPH Reopening Protocols for K-12 Schools, attached to the LACDPH Health Officer Order (dated September 17, 2021) at [Appendix T1](#), and must follow the Protocol for COVID-19 Exposure Management Plan in K-12 Schools, attached to the LACDPH Health Officer Order (dated September 17, 2021) as [Appendix T2](#).
- c. **Mega Events (Outdoor and Indoor).** Mega Events are characterized by large crowds greater than 1,000 indoor or 10,000 outdoor attendees. Mega Events include conventions, conferences, expos, concerts, shows, nightclubs, sporting events, live events and entertainment, fairs, festivals, parades, theme parks, amusement parks, water parks, large private events or gatherings, marathons or endurance races, and car shows. Mega Events may have either assigned or unassigned seating, and may be either general admission or gated, ticketed and permitted events. These events are considered higher risk for COVID-19 transmission.
 1. **Indoor Mega Events:** Indoor Mega Events where 1,000 or more people are in attendance remain open to the public. In addition to the public health recommendations, Indoor Mega Event operators must verify the full vaccination status³ or pre-entry negative COVID-19 viral test⁴ result of all attendees. Attendees must wear a face covering while indoors at an Indoor Mega Event. Indoor Mega Event operators must prominently place information on all communications, including reservation and ticketing systems, to ensure guests are aware of the proof of pre-entry negative testing or full vaccination status, including

³ The following are acceptable as proof of full vaccination status:

- (1) A photo identification of the attendee and 2) their vaccination card (which includes name of person vaccinated, type of COVID-19 vaccine provided and date last dose administered); OR
- A photo of a vaccination card as a separate document; OR
- A photo of the attendee's vaccine card stored on a phone or electronic device; OR
- Documentation of the person's full vaccination against COVID-19 from a healthcare provider.

⁴ Pre-entry negative testing is testing that must be conducted within 72 hours before event start time (both PCR and antigen are acceptable). Results of the test must be available prior to entry into the event or venue. The following are acceptable as proof of a negative COVID-19 viral test result:

- 1) A photo identification of the attendee and 2) a printed document from the test provider or laboratory; OR
- An email or text message displayed on a phone from the test provider or laboratory. The information should include the person's name, type of test performed, and negative test result (date of test must be within prior 72 hours).

masking requirements and acceptable modes of verification. For Indoor Mega Events taking place on or after September 20, 2021, self-attestation can no longer be used as a method to verify an attendee's status as fully vaccinated or as proof of a negative COVID-19 test result.

2. **Outdoor Mega Events:** Outdoor Mega Events that attract crowds of over 10,000 persons, remain open to the public. Beginning October 7, 2021, Outdoor Mega Event operators of events that are ticketed or held in a defined space with controlled points of entry must verify the full vaccination status (see footnote 3) or pre-entry negative COVID-19 viral test (see footnote 4) result of all attendees, ages 12 and older, prior to entry to the event. All attendees must wear face masks at all times, except when actively eating or drinking. Outdoor Mega Event operators must prominently place information on all communications, including reservation and ticketing systems, to ensure guests are aware of both the LACDPH Health Officer's Order that all persons must wear a face mask while in attendance and the County Health Officer requirement that all attendees, ages 12 and older, either be fully vaccinated against COVID-19 or obtain a negative COVID-19 viral test prior to attending the event. Operators are to make face masks available for all attendees.
3. **Additional Recommendations for Both Outdoor and Indoor Mega Events:** Mega Event operators are encouraged to follow these additional recommendations:
 1. Assign staff to remind all guests to wear face masks while on the premises or location.
 2. Encourage everyone to get vaccinated when eligible.
 3. Facilitate increased ventilation of indoor spaces (i.e., open all windows and doors to increase natural air flow), following California Department of Public Health [Interim Guidance for Ventilation, Filtration and Air Quality in Indoor Environments](#).
 4. Encourage everyone to sign up for [CA Notify](#) as an added layer of protection for themselves and the community to receive alerts when they have been in close contact with someone who tests positive for COVID-19.
 5. Convey the risk of attending large crowded events where the vaccine status of other attendees may be unknown to the individuals.
 6. Convey the risk of attending large crowded events for populations that may not currently be eligible for vaccination or may be immunocompromised and whose vaccine protection may be incomplete.
 7. Encourage all venues along any parade or event route to provide outdoor spaces for eating/drinking/congregating to reduce the risk of transmission in indoor settings.

- d. Overnight Organized/ Children's Camps.** An organized camp is a site with program and facilities established for the primary purpose of providing an overnight outdoor group living experience for recreational or other purposes for five days or more during one or more seasons of the year. A Notice of Intent to Operate must be submitted by the Camp operator to the Environmental Health Division at Communityhealth@ph.lacounty.gov prior to operation. The owner or operator of an Overnight Organized/Children's Camp must prepare, implement and post the required LACDPH Protocols for Overnight Organized / Children's Camps, attached to the LACDPH Health Officer Order (dated September 17, 2021) as [Appendix K-1](#).
- e. Organized Youth Sports Activities.** Organized youth sports include all school (TK-12 Grades) and community-sponsored programs and recreational or athletic activities and privately organized clubs and leagues. Organized Youth Sport Protocols do not apply to collegiate or professional sports. The Protocol provides direction on outdoor and indoor youth sports activities to support an environment that presents less risk for participants of these sports. The organizers and operators of Organized Youth Sport Activities must review, implement and post the required LACDPH Protocol for Organized Youth Sports, effective September 1, 2021, attached to the LACDPH Health Officer Order (dated September 17, 2021) as [Appendix S](#).
- f. Bars, Breweries, Wineries and Distilleries.** Effective October 7, 2021, bars that have a low-risk food facility public health permit and breweries, wineries and distilleries with a #1, #2, #4, #23 and/or #74 state alcohol license that do not possess or that are not required to have a public health permit to operate must require patrons, who are 12 years of age or older, to provide proof of their COVID-19 vaccination status for entry. Between October 7 and November 3, 2021, all patrons must provide proof that they have received at least one dose of COVID-19 vaccination for entry into the facility to obtain indoor service at a bar, brewery, winery, or distillery. Beginning November 4, 2021, all bars, breweries, wineries and distilleries must require patrons, who are 12 years of age or older, to provide proof of full vaccination against COVID-19 for entry into the facility to obtain indoor service. Patrons who do not provide proof of vaccination against COVID-19, as specified, may be served in and use the outdoor portions of the facility, where the risk of exposure to the virus that causes COVID-19 is less likely when compared to being indoors. See Section 5 paragraph (i) below for further clarification. Bars, breweries, wineries and distilleries must comply with the [Guidance for Verifying Proof of COVID-19 Vaccination](#) and [Guidance for Verifying Proof of a Negative COVID-19 Test](#) attached to this Order. In addition, by November 4, 2021, all on-site employees must provide their employer with proof of full vaccination against COVID-19.⁵

⁵ On-site employees of the bars, breweries, wineries, distilleries, nightclubs and lounges may be exempt from the vaccination requirements only upon providing their employer, a declination form, signed by the individual stating either of the following: (1) the worker is declining vaccination based on sincerely held religious beliefs, or (2) the individual is excused from receiving any COVID-19 vaccine due to Qualifying Medical Reasons.

- g. Nightclubs and Lounges.** Effective October 7, 2021, nightclubs and lounges⁶ that are open only to persons 18 years of age or older, must require patrons and on-site personnel to provide proof of their COVID-19 vaccination status for entry. Between October 7 and November 3, 2021, patrons must provide proof they have received at least one dose of COVID-19 vaccination for entry into the facility to obtain indoor service at a nightclub or lounge. Beginning November 4, 2021, all nightclubs and lounges must require patrons to provide proof of full vaccination for entry into the facility to obtain indoor service. Patrons who do not provide proof of full vaccination against COVID-19 may be served in outdoor portions of the facility, where the risk of exposure to COVID-19 is less likely when compared to indoors. Nightclubs and lounges must comply with the [Guidance for Verifying Proof of COVID-19 Vaccination](#) and [Guidance for Verifying Proof of a Negative COVID-19 Test](#) attached to this Order. In addition, by November 4, 2021, all on-site employees must provide their employer with proof of full vaccination against COVID-19 (see footnote 5).
- h. Restaurants.** These indoor venues serve food or drink indoors and are required to maintain a valid public health permit to operate. Due to the increased risk of transmission at places where persons are indoors and unmasked, the City of Los Angeles and the County Health Officer strongly recommend that the operators of these venues reserve and prioritize indoor seating and service for patrons who are fully vaccinated against COVID-19. They should verify the full vaccination status of all patrons, 12 years of age or older, who will be seated indoors for food or beverage service. Patrons who cannot provide proof of full vaccination against COVID-19 should be served in outdoor portions of the facility, where the risk of exposure to the virus that causes COVID-19 is less likely when compared to being indoors. See Section 5 paragraph (i) below for further clarification.
- i.** For clarity, individuals who do not provide proof of partial or full vaccination at bars, breweries, wineries, distilleries, nightclubs and lounges may use the outdoor portions of the facility, but may not remain inside the facility except as

-
- a. To be eligible for a Qualified Medical Reasons exemption the individual must also provide to their employer a written statement signed by a physician, nurse practitioner, or other licensed medical professional practicing under the license of a physician stating that the individual qualifies for the exemption (but the statement should not describe the underlying medical condition or disability) and indicating the probable duration of the worker's inability to receive the vaccine (or if the duration is unknown or permanent, so indicate). See the most updated version of the [CDC's Interim Clinical Considerations for Use of COVID-19 Vaccines guidance](#).
- b. If an operator of a bar, brewery, winery, distillery, nightclub or lounge deems its on-site employee to have met the requirements of an exemption, the unvaccinated exempt employee must meet the following requirements when entering or working in such facility:
1. Test for COVID-19 at least once per week with either polymerase chain reaction (PCR) or antigen test that either has Emergency Use Authorization (EUA) by the U.S. Food and Drug Administration or be operating per the Laboratory Developed Test requirements by the U.S. Centers for Medicare and Medicaid Services.
 2. Wear a surgical mask or higher-level respirator approved by the National Institute of Occupational Safety and Health (NIOSH), such as an N95 filtering facepiece respirator, at all times while in the bar, brewery, winery, distillery, nightclub or lounge.

⁶ Nightclub means a commercial establishment dispensing beverages for consumption on the premises and in which dancing is permitted or entertainment is provided, and/or has as its primary source of revenue: (a) the sale of alcohol for consumption on the premises, (b) cover charges, or (c) both. A lounge is defined as a business that operates primarily for the preparation, sale, and service of beer, wine, or spirits. Minors are not allowed in a lounge.

solely provided in the subsections below:

1. The individual, who is wearing a well-fitted mask, may enter the indoor portion of the facility as part of their employment to make a delivery or pick-up, provide a service or repair to the facility, or for an emergency or regulatory purpose.
 2. The individual, who is wearing a well-fitted mask, may enter the indoor portion of the facility to get to the outdoor portion of the facility or to use the restroom.
 3. The individual, who is wearing a well-fitted mask, may enter the indoor portion of the facility to order, pick-up, or pay for food or drink “to go.”
6. If traveling, all individuals should follow all LACDPH and CDC travel guidance located at: <http://publichealth.lacounty.gov/media/Coronavirus/traveladvisory.htm> and <https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html>.
7. To the extent that this Order is in conflict with earlier Orders, this Order shall supersede the others.
8. Failure to comply with this Order shall constitute a misdemeanor subject to fines and imprisonment. I hereby urge the Los Angeles Police Department and the City Attorney to vigorously enforce this Order via Sections 8.77 and 8.78 of the Los Angeles Administrative Code.
9. Business owners and operators are authorized to refuse service to any individual who fails to comply with this Order.
10. Because guidance may change, the owner, manager, or operator of any facility that is subject to this Order is encouraged to consult the Los Angeles County Department of Public Health’s website (www.publichealth.lacounty.gov) daily to identify any modifications to the LACDPH Order (dated September 17, 2021) and the Best Practice Guidance.
11. If any subsection, sentence, clause, phrase, or word of this Order or any application of it to any person, structure, or circumstance is held to be invalid or unconstitutional by a decision of a court of competent jurisdiction, then such decision shall not affect the validity of the remaining portions or applications of this Order.

This Order shall be in place during the local emergency period, and it may be amended or rescinded as warranted according to local public health conditions.
